

25% Off R&S Phase Noise & VCO Tester

Limited Time Trade In promotion offered by Rohde & Schwarz

Upgrade to an industry leading **high performing** phase noise and VCO tester by trading in an eligible phase noise analyzer. Talk to your local Rohde & Schwarz salesperson today to take advantage of this offer.

R&S®FSPN Phase Noise Analyzer and VCO Tester

Unrivalled Sensitivity Meets High Speed

- ▶ Dedicated phase noise analyzer and voltage controlled oscillator (VCO) tester with high measurement speed due to hardware-implemented real-time cross correlation
- ▶ Frequency range from 1 MHz to 26.5 GHz
- ▶ Very high sensitivity for phase noise measurements thanks to dual synthesizers
- ▶ Extremely low-noise internal DC sources for automatic VCO characterization

▶ Most Complete

Single box solution up to 26 GHz with frequency range: 1 MHz to 8 / 26.5 GHz

▶ Best solution

Extremely low-noise internal DC sources for automatic VCO characterization

Eligibility

Receive a 25% discount for trade in:

Keysight: E5052A, E5052B, E5505A, N5511A
Berkley Nucleonics 7000 Series **with source**
Holzworth HA7062C **with source**
Noise XT

Receive a 15% discount for trade in:

Berkley Nucleonics 7000 series **without source**
Holzworth HA7062C **without source**

Equipment must be operational. Equipment must be shipped to Rohde & Schwarz, USA. Applies to any configuration R&S®FSPN. 25% or 15% discount from R&S®FSPN list price
