

Rohde & Schwarz mobile network testing integrates Samsung Galaxy S8 smartphones

Rohde & Schwarz mobile network testing (R&S MNT) stays ahead of the competition also in device support: the leading global supplier of mobile network testing solutions is first to completely integrate Samsung Galaxy S8 smartphones into its comprehensive product portfolio for testing the cellular ecosystem, from RF to QoE.

Munich, May 29, 2017 — After the initial integration into R&S ROMES4 Drive Test Software earlier this year, R&S MNT has now completed the full integration of the new Samsung Galaxy S8 and S8+ smartphones into its complete portfolio of mobile network testing solutions. With the full integration into its QualiPoc, Benchmarker, and Freerider products, R&S MNT enables operators and service providers to test and measure Quality of Experience (QoE) from a true end-user perspective, including video, voice, and apps.

Hanspeter Bobst, Vice President of R&S MNT and CEO of SwissQual AG, a Rohde & Schwarz company, says: “With the very fast and complete integration of the Galaxy S8, we’re offering our customers a competitive edge and support in testing and optimizing forward-thinking features and technologies, including 4x4 MIMO, from a true end-user perspective. Also, the integration perfectly complements our 4x4 MIMO network scanner test solution for a comprehensive view of the RF environment. Offering both views, QoE and RF, is of great value to top tier operators who have been investing immensely in infrastructure to meet the growing need for more capacity, triggered by the data explosion and increased subscriber penetration.”

Initial shipments to priority customers are planned within the next few weeks. To satisfy the market’s high demand, R&S MNT continues to integrate the various models into its customized solutions for mobile network testing.

Mobile network testing in brief

Rohde & Schwarz is a leading global supplier of mobile network testing solutions. The company's extensive and diverse product portfolio provides sophisticated, cost-effective test solutions for mobile operators, infrastructure vendors, testing service providers, installation companies and government regulators. The products address every test scenario in the network lifecycle – from base station installation to network acceptance and network benchmarking; from optimization and troubleshooting to interference hunting and spectrum analysis; from IP application awareness to QoS and QoE of voice, data, video, and app-based services.

Rohde & Schwarz mobile network testing solutions provide all the hardware, software and resources that the mobile networking industry needs to efficiently deliver better services with higher quality for customers while enabling suppliers to increase the value of their networks and products.

Rohde & Schwarz

The Rohde & Schwarz electronics group offers innovative solutions in all fields of wireless communications as well as in IT security. Founded more than 80 years ago, the independent company has an extensive sales and service network with subsidiaries and representatives in more than 70 countries. On June 30, 2016, Rohde & Schwarz had approximately 10,000 employees. The group achieved a net revenue of approximately EUR 1.92 billion in the 2015/2016 fiscal year (July to June). The company is headquartered in Munich, Germany, and also has strong regional hubs in Asia and the USA.
